

COMMERCIAL DOOR AND GATE OPERATORS SINCE 1969

All PowerMaster products are engineered and manufactured in the U.S.A., and have been UL-approved since 1976. V.E. Power Door is proudly family owned and operated. Thousands of PowerMaster products across the country can easily be replaced with the new 2018 PowerMaster models!

The NEW UL-approved 2018 PowerMaster TURBO (CDO) and NITRO (Gate Operator) models are available now and both include:

- Patent-pending safety monitor that auto-detects and adjusts itself between pulse or resistive (10K) type safety accessories.
- Built-in 433 MHz PowerMaster receiver — included with all operators!
- Built-in dual voltage power board (1 phase or 3 phase) and has 3 types of surge protection for ease of installation and added safety!

All 2018 UL-approved CDOs feature:

- TURBO board that works with every CDO model. DC version Medium Gear Drive Operator (DC-MG) is also available.
- Simple push button programming, Classic LED Diagnostics, and up to 3 types of monitored safety devices!
- All CDOs include one set of photo eyes and one 3-button control station.
- Universal terminal strip that works with most other industry receivers!

All 2018 UL-approved Commercial Gate Operators feature:

- NITRO board with every gate operator with options for AC or DC Motor Control!
*DC models will include DC power supply and batteries.
- LCD display for easy programming and diagnostics.
- Gate operators include two PowerMaster remotes, one 3-button station, and your choice of a safety package.
